

# PRO MIX EURO

Value counting for euro notes

Highest accuracy in banknote verification

Sort by denomination from 2 mm in the size of banknotes

## ADVANTAGES

- ▶ Advanced technologies of the new generation, high quality assemblage
- ▶ Identification of euro denomination and recognition of suspicious banknotes thanks to the multiple sensor system, including the CIS RED SCANNER IR + WHITE scanner
- ▶ High level of complete counterfeit detection due to all sensors which can be calibrated to different levels
- ▶ Detailed description of the counting results for each denomination on the clear high contrast LCD display with backlit
- ▶ Detailed indication of the counting results in the last bundle
- ▶ Easy access to the feeding mechanism for preventive cleaning
- ▶ Ability to update software via PC
- ▶ Compact size and easy use
- ▶ Warranty 24 months

## FUNCTIONS

- ▶ Counting and verification of middle and big amounts
- ▶ COUNT mode - simple counting of all kinds of currencies
- ▶ MIX mode- mixed value counting of Euro banknotes
- ▶ VALUE mode - single value counting and sort by denomination (for any currencies)
- ▶ Variable BATCH mode and summation

## APPLICATIONS

The PRO MIX EURO perfect banknote counter for any cashier. It determines the authenticity of banknotes, recognizes their denominations and counts the amount of mixed Euro banknotes. Accurate detection allows the PRO MIX EURO to be used for counting and identifying currencies with denominations of different sizes.
